

EMERGENCY MANAGEMENT, SEARCH AND RESCUE, TRAINING, AND LOGISTICS HUB

A multi-agency training, operations & management space.

43°49'37"N 66°05'17"W

We are Canada's Atlantic proving ground for civilian & military aerospace. A unique facility & environment for testing, training, R&D and operations.

APA offers aviation access, staging capacity, coastal conditions, and the opportunity to integrate aircraft, drones, communications, logistics, and emergency-command functions.

We are suited for aerial-firefighting operators, helicopter companies, emergency-communications providers, public-safety drone developers, medical-transport operators, simulation firms, logistics providers, and companies supporting disaster response, climate resilience, and critical-infrastructure recovery.

- ▶ Train year-round.
- ▶ Conduct realistic exercises.
- ▶ Integrate UAVs.
- ▶ Conduct wildfire simulations.
- ▶ Test SAR technologies.
- ▶ Support Coast Guard.
- ▶ Support Public Safety Canada.
- ▶ Validate emergency communications.
- ▶ Conduct logistics exercises.
- ▶ Support disaster response.
- ▶ Dual-runway configuration supports simultaneous helicopter, fixed-wing, and UAV operations.
- ▶ Uncongested environment enables rapid deployment without competing traffic.

- ▶ Available space for staging areas, equipment storage, and emergency operations facilities.
- ▶ Central location within Southwestern Nova Scotia for multi-agency coordination.

Aerospace Park Atlantic

EMERGENCY MANAGEMENT, SEARCH AND RESCUE, TRAINING, AND LOGISTICS HUB

Aerospace Park Atlantic is a fully integrated aerospace and defence ecosystem. We are a multipurpose, registered aerodrome, with a business park, operations and research facility.

APA provides a complementary platform to major hubs, enabling activities that are increasingly difficult to accommodate in larger, capacity-constrained environments.

RUNWAY 1
DIRECTIONS: 06/24
LENGTH: 6000 FT / 1829 M

RUNWAY 2
DIRECTIONS: 15/33
LENGTH: 5000 FT / 1524 M

Strong Business Environment

- ▶ Competitive labour and occupancy costs relative to major North American aerospace centres.
- ▶ A favourable Canadian-dollar exchange rate for many U.S. and international investors.
- ▶ Stable political environment.
- ▶ Strong IP protection.
- ▶ World-class university and research ecosystem.
- ▶ Access to Canadian SR&ED tax credits.
- ▶ Highly educated workforce.
- ▶ Immigration programs supporting skilled workers.
- ▶ Competitive industrial land costs.
- ▶ Potentially competitive facility occupancy and operating costs.
- ▶ Collaborative governance with the flexibility to work closely with industry, government, Indigenous partners, and researchers.

Innovation Infrastructure

Access to:

- ▶ Canada's globally respected R&D ecosystem.
- ▶ Strong autonomous systems research.
- ▶ Ocean technology leadership.
- ▶ AI ecosystem.
- ▶ Defence innovation funding.
- ▶ Access to Mitacs, NSERC, IDEaS, SIF and ACOA.
